PROFESSIONAL SUMMARY

Full-Stack Engineer with 3+ years of professional experience in architecting, developing, and scalable web and mobile solutions. Proven track record in engineering high-performance backend architecture using Node.js and Laravel, alongside highly responsive frontends with React and Next.js. Deeply committed to clean code principles, rigorous system stability, and delivering robust, production-ready applications.

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer | Aratech

UAE (Remote) | 08/2024 – Present

- Delivered 3+ full-stack applications using React and Laravel, integrating Directus and Strapi to streamline content management workflows across multiple projects.
- Designed and built high-performance ATM web interfaces using Vanilla JavaScript, improving UI responsiveness and reducing rendering delays by ~25%.
- Contributed to improving team sprint velocity by providing technical mentorship and refining code review processes for faster iteration cycles.
- Optimized backend logic and server architecture, reducing API latency by ~30% while maintaining 99.9% system uptime.

Full-Stack Web Developer | WMK Tech

Lebanon (Remote) | 02/2024 – 07/2024

- Launched an enterprise e-commerce platform using React and Laravel, improving mobile user experience and increasing checkout completion rate by ~20–30%.
- Led migration of a legacy digital store to a modern stack, reducing page load times by ~35–40% and improving overall performance stability.
- Designed and built fully responsive user interfaces, enhancing cross-device engagement and improving user retention across mobile and desktop.
- Strengthened application security and refactored complex database queries, improving checkout processing speed and reducing backend response overhead by ~25%.

Full-Stack Web Developer | Rare Web

Syria (Remote) | 08/2023 – 01/2024

- Designed and developed robust Laravel REST APIs tailored for mobile applications, improving data retrieval efficiency and reducing response overhead by ~25–30%.
- Collaborated on cross-platform Flutter mobile integration, ensuring seamless API-to-client synchronization and enhancing overall user experience consistency.
- Refactored and stabilized a legacy full-stack Laravel codebase, resolving critical architectural and functional issues and improving system reliability.
- Architected a React/Laravel web application, optimizing end-to-end data flow and improving baseline system performance by ~20%.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, SQL, HTML5, CSS3 | Frameworks: Laravel, Node.js, Express.js, Nest.js, React.js, Next.js, React Native | Libraries: Redux Toolkit, Bootstrap, Tailwind CSS | Databases: MySQL, PostgreSQL, MongoDB | ORM: Prisma | APIs: REST, WebSockets, Socket.io, JWT | Testing: Unit Testing, Vitest | DevOps: Docker, CI/CD, Git, GitHub, GitLab | CMS: Directus, Strapi.

PERSONAL PROJECTS

Bero Talker (Real-Time Chat Application)

01/2026 – 03/2026

Built a high-performance messaging system designed for reliable real-time collaboration, implementing secure token-based authentication protocols and real-time data synchronization layers to ensure a smooth and responsive user experience.

Bero Tasker (Productivity Suite)

10/2025 – 12/2025

Developed a cross-platform mobile productivity application focused on structured tasks and personal notes management and designed an intuitive and secure UI tailored for professional daily workflows ensuring a successful deployment.

Initvel (Laravel Multilingual Package)

11/2024 – 12/2024

Published an open-source Laravel extension package designed to streamline application localization and automate foundational directory structures and implemented custom middleware components and abstract route definitions improving engineering setup efficiency.

OSUM (Employment & Freelancing Platform)

12/2022 – 04/2023

Built a distributed remote freelancing platform linking developers to international firms, integrating a secure third-party financial payment gateway alongside peer-review algorithms and chat systems to improve hiring workflows.

CompaStudent (Lecture Scheduling System)

04/2022 – 06/2022

Built an automated scheduling system for university lecture timetables and dynamic room occupancy logs, and developed background scheduling scripts and notification mechanisms to keep administration and students synchronized. Review and matching mechanisms to improve hiring accuracy and user engagement.

EDUCATION

Bachelor's degree in software engineering | Latakia University

Latakia, Syria | 10/2018 – 12/2023

LANGUAGES

Arabic: Native Speaker

English: Professional Working Proficiency
