PROFESSIONAL SUMMARY

Full-Stack Engineer with 3+ years of experience building scalable web and mobile applications. Experienced in backend architecture using Node.js and Laravel, and modern frontend development with React and Next.js. Focused on clean code, system reliability, and production-ready software delivery.

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer | Aratech UAE (Remote) | 08/2024 – Present

- Delivered 3+ full-stack applications using React and Laravel, integrating Directus and Strapi to streamline content management workflows.
- Built high-performance ATM web interfaces with Vanilla JavaScript, improving UI responsiveness and reducing rendering delays by ~25%.
- Enhanced sprint velocity through technical mentorship and streamlined code review processes, in collaboration with the team.
- Optimized backend logic and server architecture, reducing API latency by ~30% while maintaining 99.9% uptime.

Full-Stack Web Developer | WMK Tech Lebanon (Remote) | 02/2024 – 07/2024

- Launched an enterprise e-commerce platform using React and Laravel, improving mobile experience and increasing checkout completion rates by ~20–30%.
- Led the migration of a legacy store to a modern stack, reducing page load times by ~35–40% and improving performance stability.
- Crafted responsive user interfaces across web applications, ensuring consistent performance and visual quality across devices.
- Strengthened application security and optimized database queries, improving checkout speed and reducing backend response overhead by ~25%.

Full-Stack Web Developer | Rare Web Syria (Remote) | 08/2023 – 01/2024

- Designed and developed scalable Laravel REST APIs for mobile applications, reducing response overhead by ~25–30%.
- Collaborated on Flutter integration, ensuring seamless API-to-client synchronization and consistent user experience.
- Refactored and stabilized a legacy Laravel codebase, resolving critical architectural issues and improving system reliability.
- Architected a React/Laravel web application, optimizing data flow and improving overall system performance by ~20%.

TECHNICAL SKILLS

- ✓ Languages: PHP, JavaScript, TypeScript, SQL, HTML5, CSS3.
- ✓ Frameworks: Laravel, Node.js, Express.js, Nest.js, React.js, Next.js, React Native, Tailwind CSS.
- ✓ Databases & ORM: MySQL, PostgreSQL, MongoDB, Prisma.
- ✓ APIs & CMS: RESTful APIs, WebSockets, Socket.io, GraphQL, JWT, Directus, Strapi.
- ✓ DevOps & Tools: Docker, CI/CD, Git, GitHub, GitLab.
- ✓ Testing: Unit Testing, Vitest.

PERSONAL PROJECTS

Bero Talker (Real-Time Chat Application) 01/2026 – 03/2026

- Developed a real-time chat application featuring secure token-based authentication and data synchronization for reliable communication and seamless user interactions.

Bero Tasker (Productivity Suite) 10/2025 – 12/2025

- Created a cross-platform productivity application for task and note management, featuring an intuitive and secure UI tailored for professional workflows and successful deployment..

Initvel (Laravel Multilingual Package) 11/2024 – 12/2024

- Published an open-source Laravel localization package that automated foundational directory structures and included custom middleware and abstract route definitions to improve engineering setup efficiency.

OSUM (Employment & Freelancing Platform) 12/2022 – 04/2023

- Engineered a remote freelancing platform connecting developers with international companies, integrating a secure payment gateway, peer-review system, and real-time chat to streamline hiring workflows.

CompaStudent (Lecture Scheduling System) 04/2022 – 06/2022

- Implemented an automated lecture scheduling system with dynamic room occupancy tracking, background scheduling processes, and notification mechanisms to keep administrators and students synchronized.

EDUCATION

Bachelor's degree in software engineering | Latakia University Syria | 10/2018 – 12/2023
