PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer with 3+ years of professional experience in architecting, developing, and deploying scalable web and mobile solutions. Proven track record in engineering high-performance backend architectures using Node.js and Laravel, alongside highly responsive frontends with React and Next.js. Deeply committed to clean code principles, rigorous system stability, and delivering robust, production-ready applications.

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, TypeScript, HTML5, CSS3, SQL.
- **Frameworks & Libraries:** Laravel, Node.js, Express.js, Nest.js, React.js, Next.js, React Native, Bootstrap, Tailwind CSS.
- **Databases & ORMs:** MySQL, PostgreSQL, MongoDB, Prisma ORM.
- **Headless CMS & Tooling:** Directus, Strapi, Socket.io, Git, GitHub, GitLab, RESTful APIs.

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer | Aratech

UAE (Remote) | 08/2024 – Present

- Successfully delivered 3+ full-stack applications using React and Laravel, integrating Directus and Strapi to streamline content management workflows.
- Engineered high-performance web interfaces for ATMs using Vanilla JavaScript, significantly accelerating UI rendering and responsiveness.
- Boosted team sprint velocity through technical mentorship and establishing clearer, faster code review pipelines.
- Optimized core backend logic and server architecture, noticeably reducing API latency while maintaining 99.9% uptime.

Full-Stack Web Developer | WMK Tech

Lebanon (Remote) | 02/2024 – 07/2024

- Launched an enterprise e-commerce platform using React and Laravel, significantly improving mobile user experience and checkout completion.
- Spearheaded the complete migration of a legacy digital store to a modern stack, drastically reducing page load times.
- Engineered fluid, fully responsive user interfaces, advancing cross-device user retention and engagement.
- Fortified application security and refactored complex database queries to ensure faster, seamless checkout processing.

Full-Stack Web Developer | Rare Web

Syria (Remote) | 08/2023 – 01/2024

- Engineered robust Laravel REST APIs tailored for mobile applications, optimizing data retrieval and structure for faster performance.
- Collaborated on cross-platform Flutter mobile integration, achieving seamless API-to-client synchronization and optimal UX.
- Systematically refactored and finalized an inherited legacy full-stack Laravel codebase, successfully resolving critical architectural and functional bugs.
- Architected a React/Laravel web application, optimizing end-to-end data flow mechanics to improve baseline system performance.

PERSONAL PROJECTS

Bero Talker (Real-Time Chat Application)

01/2026 – 03/2026

Engineered a high-performance messaging ecosystem built for reliable, real-time collaboration. Implemented secure token-based authentication protocols and seamless live data synchronization layers to ensure a resilient and fluid user experience.

Bero Tasker (Productivity Suite)

10/2025 – 12/2025

Developed a comprehensive cross-platform mobile productivity application focused on highly structured task and personal note management. Architected an intuitive, secure UI tailored for professional daily workflows, guaranteeing a successful deployment.

Initvel (Laravel Multilingual Package)

11/2024 – 12/2024

Authored and published an open-source Laravel extension package designed to streamline application localization and automate foundational directory structures. Engineered custom middleware components and abstract route definitions, boosting engineering setup efficiency.

OSUM (Employment & Freelancing Platform)

12/2022 – 04/2023

Built a specialized distributed remote freelancing platform linking active developers to international firms. Integrated a secure third-party financial payment gateway alongside transparent peer-review algorithms and integrated chat systems to refine hiring funnels.

CompaStudent (Lecture Scheduling System)

04/2022 – 06/2022

Engineered an automated scheduling ecosystem tailored to map university lecture timetables and dynamic room occupancy logs. Programmed background automated reservation scripts and instant push notification mechanisms to keep administration and students synchronized.

EDUCATION

Bachelor's Degree in Software Engineering | Latakia University

Latakia, Syria | 10/2018 – 12/2023

LANGUAGES

- **Arabic:** Native Speaker
- **English:** Professional Working Proficiency
